

Straight Ceiling Wire ElectroGalvanized

Size	Part #	QTY / Bundle	QTY / Crate	Diameter
12 G x 12'	PTS12G12	100	5,000	0.106"

material:	Soft annealed wire conforming to ASTM A641
finish:	Regular galvanized zinc coating (zinc thickness ≥ 25 g/m ²)
application:	Hanging acoustical and drywall ceilings or to hang electrical fixtures
installation:	Use suspended from the underside of the floor structure. Once attached to pin and clip assembly, wire can be installed with low velocity power actuated tools in poured concrete deck

Meet or exceeds the following specifications:

ASTM A641	Standard specification for soft, medium, and hard tempered zinc coated (galvanized) carbon steel wire in coils for general use
------------------	--

Ultimate Values

Zinc Thickness	Elongation	Yield Stress	Typical Capacity	Tensile Range
≥ 25 g/m ²	26%	≥ 59 ksi	600 lbs	75 ksi (max)
